

26 March 2024

We are writing to you about your request F0196740, which asks for the following information:

Please provide information on breaches of authorisation conditions and violations (include all breaches of regulations, laws and codes) by salmon farms since 1 January 2022.

We can advise that we have interpreted “breaches of authorisation conditions and violations” as recorded non-compliance.

From a search of records within our compliance recording system, we have identified 62 salmon farm sites which have a recorded non-compliance.

While we cannot currently confirm whether other salmon farms in Scotland have been fully compliant since 1 January 2022, the list we are providing you with is of the 62 sites which we have identified as having recorded non-compliance within our compliance recording system.
