Subject: Committee Visit to Marine Harvest
Attachments: GF Lice and mortality kgs 2018.xlsx

Dear Jenny

Good to talk to you just now. As per our conversation, Ben Hadfield, MD of Marine Harvest Scotland, would be happy to host a Committee visit and in principle this could be to any MH farm. Given the specific information that the Committee would like to explore he is suggesting Loch Duich and/or Greshornish – perhaps depending on the severity of the health challenges that exist on the chosen date. At the moment, the management issues at each site are as follows:

Loch Duich – Challenging site to manage sea lice, sealice infection and treatment ongoing, history of gill health challenges, fish around 3.5 Kg

Loch Greshornish – Complex gill health and severe anemia leading to mortality in February, but situation improving gradually.

Ben has also supplied sea lice and mortality data for all the MH farms in Scotland (attached). Mortality is in total kilos and it is important to remember that it is from a standing biomass in the sea of around 26,000 tonnes. The lice figures are provided as Gravid Female Lice.

Regarding dates, Ben would want to be involved in the Committee visit and can be available until he travels to Canada from the 24th April to the 1st May.

Look forward to hearing from you re possible dates etc.

Kind regards
Julie

Julie Edgar
