Dear [REDACTED]

I hope this finds you and the team well.

Would appreciate a quick catch-up on SAIC's funded Cleantreat project and technology, which Benchmark are developing.

It would be beneficial to understand SEPA's position in terms of regulation of the equipment's use following this instrument development and testing phase. There is interest from the sector in utilising the technology in the future to best manage chemical lice treatments, and who wish to better understand the practical detail in the potential steps to proceed with this technology.

Please let me know if you would be available for a chat in the next week.

Best wishes,
